Applied Behavior Analysis (ABA)

We deliver ABA Therapy, an internationally renowned and empirically validated approach, to children, adolescents, and adults with autism, ADHD, developmental delays, and behavioural or emotional challenges. By decreasing maladaptive habits and enhancing communicative, social, adaptive, and everyday living abilities, our customised, data-driven programs help individuals become more independent, confident, and have a greater quality of life.

We Focus on:

- Communication and Social Skills – Building meaningful interactions.
- Cognitive and Academic Growth – Strengthening thinking and learning abilities.

- Adaptive and Daily Living Skills – Encouraging independence at home and school.
- Behavioral Regulation – Reducing challenges and promoting positive behaviors.

ABA Services for Children

- **Neurodevelopmental Conditions:** ASD, ADHD, developmental delays
- **Behavioral Challenges:** Tantrums, aggression, self-injury, poor attention, difficulty following instructions
- **Social and Communication Skills:** Play skill deficits, poor eye contact, joint attention difficulties, trouble with waiting, sharing, and turn-taking
- **Daily Living and Readiness:** Feeding challenges, toilet training, school readiness, delays in self-help skills, coping with transitions

ABA Services for Adults

- **Social and Emotional Skills:** Advanced social communication, emotional & behavioral regulation, anger management, counseling support
- **Daily Living and Independence:** Community participation, functional independence, daily living, vocational, and adaptive skills
- **Behavioral Support:** Targeted interventions for neurodevelopmental challenges
